<i>Misc & Editor Comments</i>	24-34

FROM THE VICE COMMANDANT (ACTING COMMANDANT)

With the hospitalization and passing of The Academy Commandant, Admiral Glen Diebold last month, the Academy has been busy regrouping.

Glen had many directorships and a number of unfinished projects. His assistant Directors stepped into some of his busiest and most popular Colleges. Other Colleges and projects were closed, either temporarily for work next year, or permanently, if the graduate numbers indicated that the students were not taking them anymore. A couple of his projects were picked up by willing faculty and are expected to be completed sometime in 2019.

We have brought in new members to train as Directors, and are conducting audits to evaluate the Curriculum. These audits look at the numbers of graduates for each College and School, and whether or not some Colleges are still relevant to our membership.

We have identified a number of projects for next year, including a more futuristic or analytical approach to some of our real-life topics.

My hope is that we can create fewer name-and-date type Colleges in Military Studies and explore the socioeconomic factors leading to war, and the technologies and medical applications of military innovations.

In Medicine, I hope we can create Colleges covering innovations in treatments and in limb and organ replacement, and keep these Colleges up to date.

In Science, we need Colleges that keep up with the newest discoveries in the fossil records, the latest theories of our origins, the newest discoveries in space, and the future of the human race.

These are just a few of the ideas I'm discussing with the rest of the command team, which includes our Staff and Deans.

STARFLEET's roots are Star Trek, and Star Trek ideals shall always be the heart of Academy. We need to look to the future, and not remain mired in the past. We must write for the new generations entering STARFLEET, so that Academy remains relevant to the Members. This is our First Duty.

Admiral Carol Thompson

Vice Commandant (Acting Commandant)

STARFLEET Academy

COMMANDANT GLEN DIEBOLD

DIEBOLD - Glendon L.

Of Cheektowaga, NY. September 26, 2018. Beloved husband of Nila R. (Wilbanks) Diebold; dearest father of Lisa M. (late Daniel D.) Phillips, Kelley E., and Tabitha A. Diebold; grandfather of Glen "Scotty" and Sara M. Diebold; son of the late Donald H. and Estelle I. (Hufford) Diebold; brother-in-law of Wayne (Pam) Wilbanks; also survived by nieces and nephews. No prior visitation. Family and friends are invited to attend a Memorial Service at Temple Baptist Church, 333 Cleveland Dr., Buffalo, NY, Saturday, November 10, 2018 at 10 AM. Mr. Diebold was a retired Corrections Officer of 31 years at the Erie County Sheriff's Department and a U.S. Marine Corps Veteran of the Vietnam era. Arrangements by: ERIE COUNTY CREMATION SERVICE, (716) 824-6435, 873 Abbott Rd., Buffalo, NY 14220. Please share your condolences at: www.ERIECOUNTYCREMATIONSERVICE.com

IN MEMORIAM

Admiral Glen Diebold

Born: October 24, 1949. End of Watch: September 26, 2018

Glen was many things to many people: A Husband, Father, Grandfather, Marine, POW, Corrections officer, STARFLEET officer, Academy Director, Ghost Writer, Dean, Vice Commandant, and Commandant. And he was My Friend.

Besides service to our country, and STARFLEET, he was involved in church and charity in his community, most recently, Meals on Wheels.

He joined STARFLEET in 2001, and soon after, he contacted me for a position in Academy. He was especially interested in my own College of Survival Studies, but it was a year or two later, that I was ready to pass on my first College to him. He tested out, took it over in 2003, and ran with it. He expanded the 4-course College into one of 95 courses, that covers survival in many situations.

We worked together to support the needs of other STARFLEET departments, such as the Chaplains and SpecOps (Now MACO) by helping to develop an SO training manual and courses to support their activities.

Over the 15 years he was with us, he created 3,157 Courses, directed 100 Colleges, and created 4 Institutes. He had active projects on the table at the time he was called to his Next Mission, and was actively working on those until he became ill and was hospitalized on September 2.

I had the privilege of working with him on most of his projects over the years, and we discovered that we shared the same ideas, often joking about being "joined at the hip" or "in each other's minds".

Glen was an inspiration to many Members, as evidenced from the many emails of condolences coming in from the Fleet. His real-life Military and First Responder Colleges consistently had the most graduates across Academy. I teased him about having his own "Fan Club", seeing that many of the same Members were taking all his courses. :-)

Glen left his legacy in Academy, and he will be missed, but not soon forgotten.

The Academy has renamed the 4,400 Boothby Award to the Glen Diebold Boothby Award, in his honor.

Semper Fi, My Friend!

Admiral Carol Thompson
Vice Commandant, SFA

Boldly Go.....

AROUND THE ACADEMY....OUR CONDO- LENCES

*Glen has been my friend, my brother, for over 40 yrs. I remember the first time we met, it was at the midnight shift at the "Old Place". He was assigned as my helper in the Pen Hospital. We became friends from the first handshake. I'd call him a Jarhead and he'd call me a Doggie and we called each other Brother. I miss you Glen. Save me a spot of the firing line. (Tom Pawelczak)

*I am totally at a loss for words. I know that I am not alone in this as I am readin the emails from everyone. My thoughts and prayers are with his family. (Jared Fielder)

*Oh my God. I'm devastated. (Kelli Caplette)

*We have lost one of the hardest working member of the Academy. I know this because I had work with to Beta test many courses. I will miss him great. He was a friend and I am praying for him and his family in this time of hardship. (Richard Hewitt)

*Terrible news prayers to his family and friends. (Darlene Harper)

*Glen was the person who encouraged me to become the Director and take over his College of Physics and Thermodynamics courses and then I took on the College of Orbital Mechanics. With a background in physics and astronomy, and working for NASA, I provided him with several updates to the College of Physics exams which he appreciated. I was lucky to meet him at one of the Starfleet ICs a few years ago. He will be missed. (Nancy Hall)

*Sad news indeed (Russell Bedford)

*Hi, all.....I'm very sad to hear that Glen died. I think I met him at Memphis and I'm glad I did. (Jamie Delantonas)

*Truly a great loss. Glen was an inspiration to all at the Academy and in Starfleet. Condolences to all his family and friends. (Gregory Staylor)

*This is devastating news. My sincerest condolences to his family. We have lost a great inspiration and a great asset to the Academy. As they would say in Vulcan—"Nam-tor ek'etek nelauk k'tevakh hi vesht tvidonik k'ha'kiv't'osa-veh." (We are all diminished by his death, but were enriched by his life. (Denis Rush)

*The Staff of the Andorian Orientation College and College of Fire, Rescue and Safety - Basic Dim our lights today and stand ready to assist in any way that we can. Region 12 Staff also stands ready to assist where needed. (S. Christopher Boggs)

*My deepest condolences to his family. He will be missed. I never got to meet him personally, but did converse with him on the phone multiple times. (Franklin Newman III)

*Indeed this is a very sad thing for Starfleet and Starfleet Academy. It saddens me to know that we have lost a long time member and a great person my condolences to Glenn family and friends. Although I considered him a friend even though if I never really met him. To the academy staff my condolences go out to you all of you. Carol Jill and Robin if there is anything that I can do please let me know. Again my condolences to the family and friends that Glen leaves behind, just to let you know he will always be on my mind and in my heart. (James Reed)

*My condolences to Glen's family. He will be missed very much, his hard work and presence were very much a part of SFA. (Jayden Tyronian)

*I am so sad to hear this. Glen was a great mentor who helped me get my colleges up and going. Region 11 dims its lights for his final voyage. (Eileen Reed)

* This is so very sad for the family, for the Academy, and for STARFLEET. I've known Glen for at least 12 years. I met him at the first IC that I ever attended. About a year or so after that, I started beta-testing a lot of his Spec Ops and Fire/Police/EMS courses. Between him, Scott Anderson, and I started competing as to who had more courses completed. He was always a few hundred less than I until my mother's health started declining and I took a temporary hiatus from courses and STARFLEET until after the funeral. By then, he was a few hundred ahead of me. I will definitely miss him and I pray that heaven will be a comforting place for him until we meet again. (Larry French)

*Glen was an awesome individual. We worked together on many projects. We have lost a truly amazing individual. Deepest condolences to his family. (Donald Dobrin)

*Condolences to Glen's family and friends. (Judy Waidlich)

*ADM Diebold was one of the people who inspired me to move forward into STARFLEET Academy in 2019. I found him a model of time management, and always appreciated that someone who had so much on his STARFLEET agenda, still had the time to "turn around" courses promptly and in good humour. (Gillian Shearwater)

To leave condolences online please click on the links below:

*http://www.tributes.com/condolences/leave_memory/106454370

*<https://eriecountycremationservice.com/tribute/details/1609/Glendon-Diebold/>

(If I have missed anyone,
please forgive me...it was not
intentional. Many tears will
follow behind Glen. He will be
missed.....ed.)

ACADEMY INFORMATION

ACADEMY INFORMATION

Further information about the Academy, its staff and faculty, courses offered, and scholarships will be found at the following website:

<http://main.sfiacademy.org/>

To take Academy courses online through Moodle go to the following website:

<http://sfiacademy.org/academy>

****You will receive your grade and certificate immediately after you take your exam.****

**WATCH YOUR CAREER TAKE
OFF.....JOIN STARFLEET
ACADEMY NOW!**

SO YOU WANT TO BE A DIRECTOR

Basic requirements are: Be at least 18 years of age and have taken OTS and OCC. Cadets at least 14 years of age may serve with an adult mentor.

To assume a vacancy, you must pass all of the exams in the College, or if a College of 35 to 60 exams, 75% of the exams. Colleges over 60 exams are tested out at 50%, with a maximum of 50 exams required.

Assistant Directors must meet the same requirements as the Director.

To direct a College of your own creation, first check the College Catalogue to make certain your idea is not already being used.

If the concept is not being used elsewhere, submit a College outline, exam, and key to the Course Development Contact Jill Rayburn at: jazdansfa@gmail.com

She will determine where your College fits within the Academy structure and introduce you to your Dean, who will lead you through the approval process.

AROUND THE ACADEMY PROMOTIONS

CONGRATULATIONS TO:

Debbie French to Admiral

Megan Schroeder to Captain

SNIPPETS

It's official: [The Big Bang Theory](#) is ending after Season 12.

The comedy's upcoming season will be its last, Warner Bros. Television, CBS and Chuck Lorre Productions announced in a joint statement. It will finish its run in 2019 as the longest-running multi-camera series in television history, with 279 episodes, outstripping another Lorre sitcom, *Two and a Half Men*.

"We are forever grateful to our fans for their support of *The Big Bang Theory* during the past twelve seasons," said the producers. "We, along with the cast, writers and crew, are extremely appreciative of the show's success and aim to deliver a final season, and series finale, that will bring *The Big Bang Theory* to an epic creative close."

The Big Bang Theory, which debuted in 2007 and has received 52 Emmy nominations and 10 wins, including four Lead Actor wins for Jim Parsons.

GRADUATES

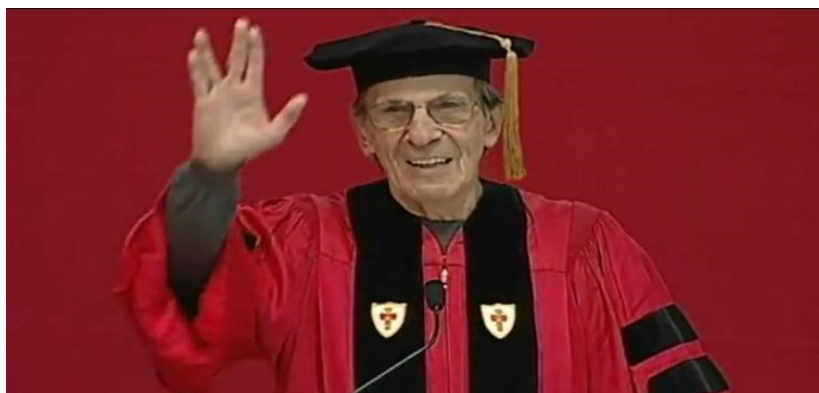

ACADEMY DEGREE PROGRAM

The Academy Degree Program allows the student to apply his or her earned Academy credit towards an Academy-wide degree.

The program is designed around a real-life University degree program in which there are certain categories of courses one must take to meet the requirements of any degree.

The ADP offers Associate, Bachelor, Masters and Doctorate degrees In the following majors:

- **Alien Studies** - Culture, language, and history of non-human species
- **Command Studies** - STARFLEET International and Star Trek departmental studies
- **Communications Studies** - Languages, media, and methods of communication
- **Entertainment Studies** - Stage and screen from actors to history to design in film, plays, and television
- **Federation Studies** - History and culture of the Federation
- **Fire & Rescue Studies** - Civilian firefighting and rescue operations
- **General Arts Studies** - Social studies, culture, artistic design, and general arts
- **History & Government Studies** - History of government, warfare, space flight, and genealogy
- **Intelligence Operations Studies** - Military and civilian spec-ops and espionage
- **Law Enforcement Studies** - Law enforcement strategies, history, material, and entertainment
- **Liberal Arts** - A well rounded general education in both SFA and SFMCA
- **Life Science Studies** - Biological sciences
- **Medical Arts** - Medical sciences
- **Military Studies** - Tactical and military strategies, history, material, and entertainment
- **Physical Science Studies** - Physical sciences
- **Science Fiction Studies** - Sci-Fi as presented in a variety of media
- **Space Studies** - Interstellar, planetary, and space exploration studies
- **Special Operations Studies** - Special Operations in the armed forces and as presented in movies
- **Supernatural Studies** - Fantasy, horror, and supernatural studies through various forms of media
- **Technology Studies** - Technological sciences and equipment
- **Contact ADM Franklin Newman at: franklinnewman3@gmail.com**

R

Ruby Rose suits up as The CW's Batwoman

We can turn off the Bat signal, because Batwoman has arrived!

The CW has unveiled our first look at Ruby Rose in her Colleen Atwood-designed Batwoman supersuit — and it looks very comic book accurate with the Bat-symbol, the cape, and, of course, Kate Kane's patented long red hair.

Rose will make her debut as the popular Gotham City hero in this year's three-night Arrowverse crossover "Elseworlds," which will include *Arrow*, *The Flash*, and *Supergirl*. If everything goes according to plan, Rose will also headline her own Batwoman series as the network is currently developing a stand-alone series around the character, too. The modern incarnation of Batwoman was important when she debuted in 2006 because she was one of DC Comics' first openly gay characters, and Rose will make a similar splash if the show gets picked up to series, making her the lead of the first TV series focused on an LGBT gay Superhero.

Although details about the crossover are scarce, we do know a few things. First, *Supergirl* (Melissa Benoist), *Green Arrow* (Stephen Amell), and the *Flash* (Grant Gustin) wind up traveling to Gotham City because of the machinations of Dr. John Deegan, a possibly insane Arkham Asylum doctor played by *Lost*'s Jeremy Davies. Furthermore, the epic event will also introduce the Monitor (*Designated Survivor*'s LaMonica Garrett), a DC Comics character of multiversal importance, Lois Lane (*Grimm*'s Elizabeth Tulloch), and Nora Fries (Cassandra Jean Amell). Tyler Hoechlin will also reprise the role of Superman.

"Elseworlds" begins Sunday, Dec. 9, with *The Flash* at 8 P.M.; continues Monday, Dec. 10, at 8 P.M. with *Arrow*; and concludes the following night at 8 P.M. with *Supergirl*.

(Ruby appeared as Stella Carlin in the television series *Orange is the New Black*)....ed

THIS IS WHAT HAPPENED TO DATA AFTER STAR TREK

As Lt. Commander Data on *Star Trek: The Next Generation*, Brent Spiner saved the ship on more than one occasion, provided comic relief, and allowed the show to explore ethical questions of personhood, sentience, and even slavery through his android character's very existence. In addition to his role as Data, Spiner also portrayed other characters on the show, such as Data's "brother" Lore and his "father," Dr. Soong. But what happened to Data after the series was over—and what has actor Brent Spiner been up to since?

In 1996, Spiner made an appearance in Roland Emmerich's smash science fiction hit *Independence Day*—although many fans may not have recognized him, because his character was so drastically different from Data. You can spot Spiner in the part of Dr. Brackish Okun, the unkempt and enthusiastic director of Area 51 who joins a surgical team during an autopsy on one of the aliens. Although Okun appears to meet a messy end, it was revealed that he survived; Spiner returned to reprise his role as Okun in the 2016 sequel, *Independence Day: Resurgence*.

Although *The Next Generation* ended its television run in 1994, that wasn't the end of Data's story. Spiner returned to the role in four *Star Trek* movies featuring the TNG cast, starting with *Star Trek: Generations* (1994) and followed by *Star Trek: First Contact* (1996), *Star Trek: Insurrection* (1998), and *Star Trek: Nemesis* (2002).

Throughout the big-screen *Trek* franchise's TNG era, Spiner had a variety of opportunities to explore his character's arc further. In *Generations*, Data finally decides to install the emotion chip Dr. Soong created for him, with mixed results. In *First Contact*, he plays an integral role when he's captured by the queen of the Borg Collective, who attempts to turn him against the Federation. During *Insurrection*, Data becomes a central part of the plot when he "malfunctions" during an away mission—which leads Picard and the crew of the *Enterprise* to discover a shadowy plot.

In *Nemesis*, Spiner played dual roles, appearing as B-4, an earlier Soong-type android, as well as Data, who works with the rest of the crew to stop a Reman leader determined to destroy the Romulan Empire and wipe out all life on Earth.

Even though Data's storyline was wrapped up during the course of 2002's *Star Trek: Nemesis*, the franchise wasn't completely done with Spiner. While the door was left open for the character of Data to potentially return, Spiner felt he'd gotten too old to play the ageless android—but in 2004, he appeared on the prequel television series *Star Trek: Enterprise* in a three-episode arc as Arik Soong, a geneticist and ancestor of Data's creator, Dr. Noonien Soong. (http://memory-alpha.wikia.com/wiki/Arik_Soong)

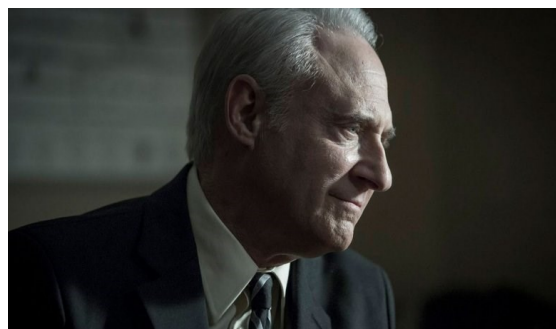

In the episodes, Soong—a doctor of genetics with questionable ethics—steals and alters some genetically engineered embryos. In doing so, he creates the "Augments," who he regards as his children. Although he's imprisoned for his actions, Soong is later recruited by the Federation to help track down and stop his "children," who are running violently amok in the galaxy and attempting to start a human-Klingon war.

In 2011, Spiner co-created and starred in his own web series, *Fresh Hell*. The show, available on YouTube, depicts a fictionalized version of Spiner, who's trying to rebuild his career after an unspecified high-profile "incident" causes him to lose everything.

THIS IS WHAT HAPPENED TO DATA AFTER STAR TREK (2)

The comedic take on Spiner's career shines in the writing, such as when a talk show host tells a guest, "We had a guest on yesterday whose face was literally ripped off by a pit bull. You know what she said to me? 'At least I'm not Brent Spiner.'" Spiner takes a neighbor under his wing, an erstwhile porn star who wants to become a real actress, and the two attempt to break back into Hollywood together. The episodes are short and funny, and fans who haven't seen it yet should definitely give Fresh Hell a watch. (<https://www.youtube.com/watch?v=JveAkAo6FLA>)

In 2002, Spiner appeared as bad guy Devlin Bowman in the Dana Carvey comedy *The Master of Disguise*. Bowman has just finished serving a two decade prison sentence, and he's determined to get his revenge on the man who put him in prison—who just happens to be the father of Carvey's character, Pistachio Disguisey. After Bowman kidnaps the elder Disguisey, it's up to Pistachio to follow in his father's footsteps and learn to be a "master of disguise" in order to save him.

Basically, the entire movie was a vehicle to showcase Dana Carvey's impressive mimicry skills, and it didn't work: *The Master of Disguise* was a critical flop that, according to the BBC's film critic, made other juvenile humor films like *Deuce Bigalow: Male Gigolo* "look like the comic equivalents of *Citizen Kane*."

In 2005, Spiner starred along with Peter Dinklage and Carla Gugino in the CBS sci-fi series *Threshold*. The trio formed the core of a secret U.S. governmental think tank tasked with humanity's first extraterrestrial contact, with Spiner playing Dr. Nigel Fenway, a NASA microbiologist brought onto the top-secret "Red Team" in charge of re-searching and containing an incident on an American naval vessel where several crew members died horribly after encountering an unidentified flying object. What Fenway and the rest of the team discover about the aliens and their ability to manipulate DNA could possibly put the entire world at risk. Although it was canceled after only one season, *Threshold* is a must-watch for Brent Spiner fans.

Because Spiner has such a rich theater background, it probably shouldn't be surprising that he's done plenty of voiceover work over the years. He's skilled at doing impressions of other actors, and has been known to spoof his TNG co-star Patrick Stewart at sci-fi conventions. In the 1999 movie *South Park: Bigger, Longer & Uncut*, he provided the voice of talk-show host Conan O'Brien, and he's also taken voice roles on several TV shows, including *Generator Rex*, *Young Justice*, *The Avengers: Earth's Mightiest Heroes*, *The Simpsons*, *Star Wars Rebels*, *Hulk* and the *Agents of S.M.A.S.H.*, and *Justice League Action*. If you're a fan of the video game *Elite Dangerous*, now you can get Spiner's voice in your spaceship; he provided a voice pack for *Vega* in 2016.

Since 2016, Spiner's biggest project has been the Cinemax horror series *Outcast*, in which he plays Sidney, a mysterious preacher involved in a tale of demonic possession and other supernatural happenings in a small West Virginia town. In an interview with the *A.V. Club*, Spiner compared Sidney to Data. "[Sidney] is the most difficult character to describe on the show," he argued. "But kind of like Data on *Star Trek*, I'm finding this character similar in the sense that we're sort of discovering him and building him as we go along. It's kind of like I'm figuring out the character at the same time the audience is."

For fans who loved Spiner's work as Data, seeing him in such a dark role might be disturbing at first, but it showcases a menacing side of his acting—one we haven't really seen since Data's brother Lore was deactivated for good.

(Ed....In 2017 Spiner voiced Edward Nigma/Riddler in *Justice League Action* the animated TV series.)

STAR TREK: DISCOVERY'S SPOCK IS ACTOR ETHAN PECK

One of the biggest casting questions of *Star Trek: Discovery*'s second season was addressed as CBS has revealed who will don the famous pointed ears of *Enterprise* science officer Spock in 2019: the answer is actor **Ethan Peck**.

The 32-year-old Los Angeles native, grandson of legendary Hollywood actor Gregory Peck, will take on the role of Michael Burnham's foster brother — and future *Star Trek* legend — Mr. Spock in the upcoming second year of *Discovery*, following in the footsteps of Zachary Quinto (who was the second primary actor to inhabit the role in the Kelvin Timeline films), and of course, the man who began the character, the late Leonard Nimoy.

DAY OF THE TRIFFIDS REMAKE WILL STRIKE FEAR INTO THE MINDS OF VIEWERS, SAYS DOUGRAY SCOTT

WHEN Dougray Scott realized what a Triffid looked like, he knew he was going to have his work cut out for him.

Those of us who've read John Wyndham's 1950s sci-fi classic or seen Howard Keel's movie have our own ideas what a giant lethal plant looks like. Thanks to the wonders of modern technology, though, that's what actor Dougray was faced with in the new BBC adaptation of the literary classic. He plays scientist Bill Masen in the updated version, which swaps the original backdrop of nuclear armageddon with the globally topical energy crisis question of today.

The 44-year-old actor says: "A Triffid is a 15ft-high cobra-like plant, very large, quite terrifying but I didn't actually see one.

The technical process is complicated, we filmed against a green screen and the Triffids are computer-generated later.

"I've done CGI and green screen stuff before but this was the most intense experience. It's actually very exhausting to act to nothing".

Since growing up in Fife, Scotland, Glenrothes-born Dougray has become one of the country's most successful actors. Now married to actress Claire Forlani following a split from casting director Sarah Trevis, mother of his two children, he's landed Hollywood roles in the likes of Mission Impossible II and Enigma. There was also his high-profile part as Teri Hatcher's love interest, Ian Hainsworth, in Desperate Housewives, a character whose wonky English accent sounded like Harold Bishop crossed with the guy who does the shipping forecast.

Now based in the US, Dougray recalls the original 1980s Triffids TV series, starring John Duttine fighting Triffids operated by a man inside a fibreglass shell on a stool with a fan. But he has fonder memories of reading the novel as a boy.

For those who don't know, the story begins with a meteor storm which blinds those who see it. As society descends into chaos, a plant bred for oil manages to overthrow its confines and starts wreaking havoc with deadly intent. Dougray's character retains

his sight, having been under bandages following an operation. As anarchy unfolds, he hooks up with a radio journalist (Nip/Tuck star Joely Richardson).

Stephen says: "The writer of our version has heavily updated the Wyndham concept, which was written at a time when people feared nuclear proliferation. There was that great fear of nuclear escape and his novel had a sort of cathartic response to that. Our production is doing a similar thing, only we've updated it to the genetic modification of plants created to replace oil in a world where oil has disappeared, which could be in the very near future".

Watch the full movie at: https://www.youtube.com/watch?v=L_wlpVFq6uQ

TNG SILVER COINS

The New Zealand Mint has just released the third and fourth silver coin notes in their limited-edition *Star Trek: The Next Generation* Silver Coin Note Collection, and the notes capture the essence of the *TNG* episodes “The Best of Both Worlds, Part I” and “Redemption, Part I” via art by Juan Ortiz.

“The Best of Both Worlds, Part I” was the cliffhanger final episode of *TNG*’s third season. “Redemption, Part I” was season four’s 26th episode, which saw the *Enterprise* travel to the Klingon Empire and attempt to thwart an impending civil war. The notes are mini replicas of the poster artwork designed by Juan Ortiz for each episode; the use of color and engraving reflect the spirit of each.

The notes are made from 5g pure silver, which is used to good effect in the design. The unique number in the mintage is printed on each and they are packaged inside a protective sleeve. Details of the coin note’s authenticity are printed on the reverse of the sleeve.

The obverse of each silver note has the Ian Rank-Broadley effigy of Her Majesty Queen Elizabeth II and is legal tender in Niue. Both releases are part of a seven-note *Star Trek: The Next Generation* Silver Coin Note Collection. A hardcover *Star Trek: The Next Generation* Collector’s Album, which is included with the purchase of the “Encounter at Farpoint, Part I” Coin Note, features a page for each note.

Only 50,000 of each note will be produced. Be sure to visit www.nzmint.com to order your *Star Trek: The Next Generation* Silver Coin Notes.

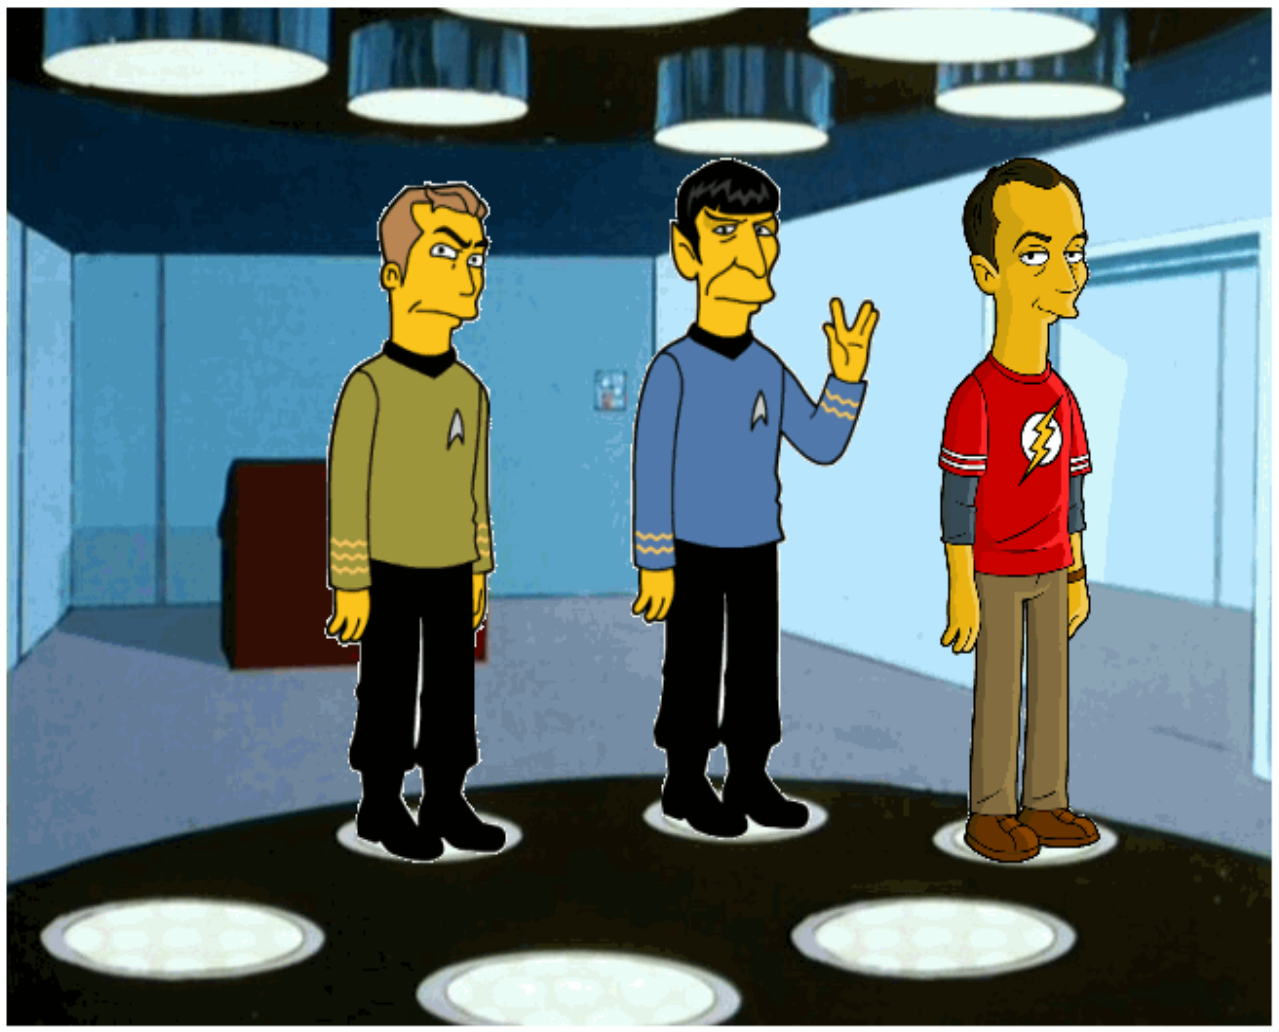

NAME THIS MOVIE

The film takes place in New York City in the year 2095 where genetically altered humans live side by side with unaltered men and women, and where Central Park has been mysteriously encased in an "intrusion zone" where people who attempt to enter are instantly killed. A strange pyramid has appeared over the city; inside, the gods of ancient Egypt have judged Horus, one of their fellow gods, to cease his immortality....

FROM THE EDITOR

Greetings Students:

I decided to do a 3rd quarter newsletter. You deserve it and it's fun.

I hope you enjoy this issue and enjoy taking our exams. We really put a lot of work into them. Soooo Take more exams!!!

From now on we will not see all TREK, but will have other SF stuff in this and future newsletters.

Till next quarter.....have fun learning and **tell your friends about us!!!**

Best Wishes,
Rear Admiral Cher Schleigh
